

BUILD2WIN

INTEGRATED CONSTRUCTION MANAGEMENT SUITE

Specifications

Revised: October 2011

Accuracy and Efficiency

Feature	Description	Field	Logistics	Maintenance
Rich Browser-Based Interface Simplifies Work Flow	BUILD2WIN's browser-based user interface means all of your information is stored on your company server, and all information is up-to date at all times. There is no software to install on laptops or office computers.	✓	✓	✓
Every Department has Instant Insight into Company-Wide Resources	Maintain your company-wide resources all in one place for BUILD2WIN Field, Logistics and Maintenance. Every department will have instant insight into any available or unavailable resources.	✓	✓	✓
Known Throughout the Industry for Ease of Use	BID2WIN Software spent years researching the design of BUILD2WIN, to ensure that the user interface is intuitive, straightforward, and easy to use. You will get up to speed quickly and easily. Plus you can work more productively with the ability to have multiple screens open without any performance loss.	✓	✓	✓

Technology

Feature	Description	Field	Logistics	Maintenance
Built on the Award-Winning Microsoft .NET and SQL Server Platform	The BUILD2WIN Integrated Construction Management Suite is built on one of the most modern and robust technology platforms in the world—Microsoft .NET, and the enterprise class database engine, Microsoft SQL Server. That means it's reliable, secure, and compatible with the latest operating systems, both now and in the future.	✓	✓	✓
Built For Streamlined Installation and Maintenance	BUILD2WIN is installed on your company server using a simple wizard. You have the option to use any of the three modules independently of each other, or in any combination. And, unlike	✓	✓	✓

	competing systems, there is no software to install and maintain on field laptops. This saves many hours of work for the IT department, and eliminates the risk that one laptop is out of date, preventing synchronization of data.			
Your Data Will Be Safe	BUILD2WIN integrates directly with the Windows security system to authenticate users, without requiring users to remember yet another password. When users open the browser and navigate to the BUILD2WIN home page, the user information they provided when they logged on to Windows is automatically called up and they are authenticated.	✓	✓	✓
Read-Only Licenses Available	Read-only licenses give you the option of allowing certain employees read-only permissions on BUILD2WIN.	✓	✓	✓

Integration

Feature	Description	Field	Logistics	Maintenance
Transfer Job Budgets from BID2WIN Estimating & Bidding	Using BID2WIN Estimating & Bidding, entire job budgets can be transferred to BUILD2WIN Field in seconds with a few mouse clicks.	✓		
Export Daily Actuals to Your Accounting Solution	BUILD2WIN's export wizard integrates with literally dozens of accounting solutions, allowing transfer of daily payroll and other related job cost information. This transfer of information saves hours of manual entry and virtually eliminates common data entry errors.	✓	✓	✓
Immediately Know When Your Equipment's Status Changes	Users of BUILD2WIN Field and Maintenance have the ability to update the status of any piece of equipment which automatically become updated in Logistics.	✓	✓	✓
Get a Jump Start on Your Foreman's Field Logs	Foreman will love you! Plan ahead by pre-populating their field logs with employees, equipment and trucking orders.	✓	✓	
Import Employee Information from Accounting	Import updated employee information from an accounting system.	✓	✓	✓
GPS System Integration	GPS system integration allows tracking of location and event-driven information, such as trucking and round trip times. BUILD2WIN Logistics integrates with most GPS systems on the market today. GPS system integration lets you import meter readings, fuel usage, equipment utilization and equipment location from GPS and Telematics systems. BUILD2WIN Maintenance integrates with most GPS systems on the market today.		✓	✓
