

## **BID2WIN SOFTWARE RELEASES NEW VERSION OF ITS BROWSER-BASED FIELD TRACKING SOLUTION**

**Portsmouth, NH, February 26, 2010** – BID2WIN Software Inc. is pleased to announce the release of the newest version of BUILD2WIN Field Tracking, BUILD2WIN version 2.0.

BUILD2WIN allows job site foremen and field managers to track real-time production quantities, labor hours, equipment hours and material quantities, and compare them against the original estimate. This significant release includes highly anticipated features such as the ability to add and delete multiple components at once and mobile field tracking, which will allow users to continue working even when their wireless connection does not.

“We are excited to deliver mobile field tracking, which will provide our clients greater flexibility when working in areas with little to no signal coverage” BUILD2WIN Product Manager Scott Johnson explains. “Clients will be able to enter field log information from any location, and the system will automatically synchronize the data behind the scenes when a connection is available—eliminating the frustration of poor signal coverage and increasing productivity.”

For a complete list of new features found in BUILD2WIN 2.0, clients may download the What’s New in BUILD2WIN 2.0 white paper, located on our secure client support web site, <http://support.bid2win.com>.

This much anticipated release of BUILD2WIN is now available for download to all BUILD2WIN clients with an active software maintenance and technical support agreement. If you are not already a BUILD2WIN client, and would like more information, visit [www.bid2win.com](http://www.bid2win.com) or contact the BUILD2WIN sales team at (800) 336-3808.

---

Located in Portsmouth, NH, BID2WIN Software Inc. offers state-of-the-art enterprise-class construction management solutions for the infrastructure industry worldwide, and is the leading provider of Windows-based cost estimating and bidding solutions.
