

K-FIVE CONSTRUCTION CORP. **CHOOSES BID2WIN**

BID2WIN Software, Inc. is pleased to welcome K-Five Construction Corp. to its ever-growing group of BID2WIN users.

From its roots as a residential paving company to its emergence as one of the largest unionized heavy highway paving contractors in the State of Illinois, K-Five's commitment to lead the industry in honesty, safety, integrity, quality services, and dedication has remained a top priority.

The marriage of the son and daughter of two prominent Chicago construction-company owners in 1941 truly began K-Five's distinguished history. Generations later, the five children of that same son and daughter are directly involved in this family company, which has grown into a 500-person force and grosses more than \$100 million a year in sales.

For over 23 years, K-Five has separated itself from the competition through a combination of experience and educated and innovative team members. Its decision to choose BID2WIN over the competing software package will allow K-Five to continue along that path of distinction, assuring clients of a well run, safe, efficient, and on-budget project.

K-Five's main office is centrally located in Lemont, Illinois. Area offices and asphalt plants also exist in Lemont, Naperville, Elmhurst, Chicago and Markham. The company also operates two high-production portable concrete plants. In addition to producing asphalt and concrete with in-place capabilities, K-Five is an industry leader in estimating, private sales, quality control/ quality assurance, project management, heavy highway general contracting, and residential/ commercial sub-contracting.
