

BID2WIN PAYS FOR ITSELF TIME AND TIME AGAIN AT WANZEK CONSTRUCTION, INC.

After three decades in the business, Wanzek Construction is equipped to bring unsurpassed experience and expertise to every project, specializing in the industries of heavy civil and underground work, wind energy, power and renewable energy. The company's relationship-based philosophy for doing business is evident throughout the organization, resulting in projects that are completed on schedule and on budget.

Wanzek's ability to stay within project parameters is facilitated by a comprehensive estimating and bidding solution from BID2WIN Software Inc. For many years, the company had used spreadsheets to manage their estimating and bidding, but found that they needed a solution that would allow them to be more accurate. Wanzek purchased BID2WIN Estimating & Bidding in 2000, and has since seen a huge return on their investment, says senior project manager Jeremy Stigen.

"WE HAVE WON MANY PROJECTS BECAUSE OF BID2WIN," HE EXPLAINS. "THE SOFTWARE PAYS FOR ITSELF TIME AND TIME AGAIN."

Using BID2WIN's Enterprise edition, Wanzek was able to standardize their estimating and bidding across the organization, utilizing centralized resources, including reusable task and item templates for repetitive work. And because BID2WIN was built from the ground up using Microsoft's most advanced development tools, it was designed to look and feel like a familiar Microsoft application, making it intuitive and easy to use.

"BID2WIN MAKES IT VERY EASY TO SHARE INFORMATION WITH THE FIELD," STIGEN CONTINUES. "IT IS SIMPLE TO FILTER THE INFORMATION FOR INDIVIDUALS AT ALL LEVELS."

BID2WIN also allows Wanzek to import cost data directly to their accounting and project management solution from Viewpoint, saving time and reducing the risk of data entry errors.
